DELIVERING SUCCESS TOGETHER

TOWER CRANES

Around the world, buildings and civil engineering products are constructed differently. But whatever architecture and construction style you're working with, there's a Terex tower crane design that's just right for saving your time and providing a great return on your investment. Terex tower cranes set up quickly, feature economical-yet-powerful motors and provide high lifting capacity. Add in the minimal downtime that Terex quality delivers, and you have outstanding value.

THE PERFECT CHOICE

TOWER CRANES

Terex doesn't limit you to one tower crane design that you need to adapt to your application. Instead, Terex tower cranes are available in self-erecting, hammerhead, flat top and luffing jib varieties, each with a wide range of sizes and capacities. You can choose the right style for your project, and each style offers the versatility to perform plenty of jobsite duties.

Flat top tower cranes

Terex flat top tower cranes are characterized by quality workmanship that provides reliable performance under continuous operation. Easy erection/maintenance and parts modularity provide a high level of cost-effectiveness. Ergonomic cabs enable crane operators to work efficiently.

Hammerhead tower cranes

Designed for easy maintenance and reliable performance for excellent uptime, the Terex SK hammerhead tower crane series provides excellent maneuverability and load moment precision. Equipped with a comfortable ergonomic cab, high-performance load diagram, and built-in safety features, the reputable time-proven design quality and components are engineered to deliver safe, reliable, cost-effective performance for long working hours.

TOWER CRANES

EFFICIENCY AT HEIGHT

Tower cranes are most commonly used where the application not only requires height, but also reach. All four varieties of Terex tower cranes give you the reach you need with the efficiency that you want. Modular construction on most models helps reduce transportation costs.

KEEPING OPERATORS IN CONTROL

A high-angle, vertical shot of a Terex tower crane. The crane's lattice boom is white with red accents at the top. It is positioned inside a massive, circular concrete structure that is under construction. The concrete walls are made of large, grey blocks. The crane's cables and pulleys are visible, extending from the top of the structure down to the crane's base. The overall scene is industrial and emphasizes the scale of the construction project.

Operators spending the day in the cab of a Terex tower crane won't be exhausted by lunchtime. The comfortable working environment features excellent visibility and an ergonomic design with controls in easy reach – all built to help keep operators fresh, productive and focused on their work to maintain safety.

- ▶ Heating and air conditioning systems for operator comfort in all climates
- ▶ All essential operation information is displayed on easy-to-read screens
- ▶ Multifunction joysticks

THE STRENGTH YOU NEED

Delivering the muscle to do the job is a hallmark of all Terex tower cranes. The power of the engine is just the beginning. All Terex tower cranes are constructed of top-quality materials proven to handle the extreme stress that can be caused by a long reach and heavy load.

The value you want

Terex tower cranes provide power without sacrificing efficiency. Hoisting gear systems are designed to work within an optimum speed range to significantly reduce operating costs. Most moving parts are powered by frequency converter motors to ensure low power require-

ments during operation. Intuitive controls reduce training costs. And structures are coated with rust-resistant paint to help ensure a long service life. It all adds up to an excellent return on your investment.
